

Landforms from Wind Erosion and Deposition PreRead

Objective

To build and enhance understanding of the relationships between key words and to practice useful skills for designing information architecture using the Card Sort strategy.

Instruction

Provide a list of words to individuals or groups of students on separate cards. Students will sort and then categorize the words. In class a student from each group can present and explain their categorization to the class. Online students can chat with their peers using a chosen chat room.

Activity

Sort the following review words into categories of your choice. Give each category a title.

Deposition	Suspended Load	Abrasion	Suspension
Creep	Bed Load	Clay	Saltation
Silt	Erosion	Sand Dune	Minerals

Instead of using cards, sort the words into categories in your notebook.
